NEWS AND  
NOTABLES

# :colors deep-space

The screenshot shows a Vim editor window titled "Luna: ~/Projects/website (vim)". The editor displays CSS code with the following content:

```
71 .nth:first-child,  
72 .nth:nth-child(even) {}  
73  
74 @media screen and (max-width: 1000px) and (min-width: 500px) {  
75     header {  
76         background-image: url(contours@2x.png), url(noise.png), url(gridline  
77         background-size: 50% auto, auto, auto, cover;  
78     }  
79  
80     .requirements p:last-child {  
81         background-image: url(contours@2x.png), url(gridlines.png), url(nois  
82         background-size: 50% auto, auto, auto, cover;  
83     }  
84 }  
85  
86 @import url('print.css');  
87  
88 /* icon fonts */  
89 @font-face {  
90     font-family: 'verdemoderna';  
91     src:url('verdemoderna.eot');  
92     src:url('verdemoderna.eot?#iefix') format('embedded-opentype'),  
93     url('verdemoderna.woff') format('woff'),  
NORMAL site.css css 87% L 86: 25
```

The code is syntax-highlighted using the 'deep-space' color scheme. The status bar at the bottom indicates the current mode is 'NORMAL', the file is 'site.css', and the cursor is at line 86, column 25.

**tyrannicaltoucan/vim-deep-space** Designed for GUI Vim and 24-bit ('true-color') terminals
